Thanks to you all. :-)

Not a promotion, just a re-assignment. There is a time constraint to get both the Drug & Terrorism labs protocols written and accredited (the AG's office is up my @\$\$.) I have temporarily taken on the role of the medical & drug advisor for Boston & South Shore.

If you guys need anything, feel free to contact me (it's no problem, it actually keeps my sanity.)

Tell Deb, I may need a vacation before I go back to Greece next summer. She needs to have some Scotch & Soda and Heineken drinks for me in Aruba.

Hey Annie,

You're the best!

The ton of weed case plea after your testimony. I think the defense was impressed that a tiny woman could lift those bails of marijuana.

I owe you drinks, Gypsy Bar. :)

Jimmy Stoddard wanted me to send you a copy of the [REDACTED] Transcript. By the way, Jimmy called you a pain in the a@@@.

Thanks a lot. Until next time or I until I call you in the middle of the night about drug questions. :)

Muchas Gracias.

This gentleman keeps insisting that he know me, according to Bucci. I testified for a case in 2005 (ridic. am't of drugs) and the case is being appealed (he is the new d/c). Gotta love Melendez-Diaz.

Thx as always.

Hey Annie!

These 2 individuals were indicted today on trafficking class D over 50 and conspiracy. That letter you made for me really helped.

Thanks for your help.

Will be touching base with you on the case.

Thanks a lot!

What do you mean u don't understand the Certs? It's perfectly clear to me. I think you need the expertise of Dr. Benjamin. ☺ LOL

Ok, I am ready: I have my M&Ms and my water . . . I may need hot chocolate.

Hope this helps (or confuse u). I have attached a summary (I did something similar for an indictment for Deb Payton on a huge case, it seem to help.)
See ya later. Enjoy the weekend.

Hi,

Hope u are well.

Wholly Crap!!! That was quick. Paul picked up the VM on Monday morning. I was more than happy to shipped it back to his office. I smelt like weed for those two days of unpacking the bags (good Canadian stuff). I got my workout and prayed no cops stopped me on the way home. :)

Now, when Chuck goes passed my desk and smells VM, his smart comment is that Annie must still be here. I have been assigned all the bulk VM samples. You should read some of the police reports esp. from Boston ...quite funny.

OK ... definitely Trafficking, over 80 lbs. And NO!!, I did not test all the bags. Your favorite phrase ... Representative Sampling.

When I get back to the Lab in the AM, I will take a look at my notes and give u a more accurate answer. (At least one bag from each Lab# was tested.)

Hey!!!!!!

Hope all is well!

We have another case together.

I just got these certs back on this case; its a DEA and local PD case.

I was just wondering if you could help me in explaining these certs.

Some of the certs say that the ID and Net Weight of the contents of the 20 plastic bags were derived from rep analysis and rep weight. some don't say that.

So, in total, how many bags were tested? Was it the same set of 20 and it was used to make the determination based on that rep, or where all the bags tested?

Also, was there a total weight with these? I need to show in trafficking, over 50 lbs.....

Any help would be GREATLY appreciated!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Thank you!!!!!!!!!!

Subject: New Regulations in the Massachusetts DMV Handbook

This just in:

New Regulations in the Massachusetts DMV Handbook:

1. Turn signals will give away your next move. A confident driver avoids using them.
2. Under no circumstance should you maintain a distance between you and the car in front of you, because the space will be filled in by somebody else, putting you in an even more dangerous situation.

3. The faster you drive through a red light, the less chance you have of getting hit.
4. WARNING! Never come to a complete stop at a stop sign. No one expects it and it will result in your being rear-ended.
5. Never get in the way of an older car that needs extensive bodywork, especially with RI, VT or ME plates. With no insurance, the other operator probably has nothing to lose.
6. Braking is to be done as hard and late as possible to ensure that your ABS kicks in, giving a vigorous, foot massage as the brake pedal violently pulsates. For those of you without ABS, it's a chance to strengthen your leg muscles.
7. Never pass on the left when you can pass on the right. It's a good way to prepare other drivers entering the highway.
8. Speed limits are arbitrary figures; given only as a suggestion and, in any case, are not enforceable during rush hour.
- 9 Just because you're in the left lane and have no room to speed up or move over doesn't mean that a RI driver flashing his high beams behind you doesn't think he can go faster in your spot.
10. Always brake and rubberneck when you see an accident or even someone changing a tire. This is seen as a sign of respect for the victim.
11. Learn to swerve abruptly without signaling. This is the home of high-speed slalom-driving thanks to the Department of Transportation, which puts potholes in key locations to test drivers' reflexes and keep them alert.
12. It is tradition to honk your horn at cars in front of you that do not move three milliseconds after the light turns green.
13. To avoid injury in the event of a collision or rollover, it is important to exit your vehicle thru the windshield right away. Wearing your seat belt will only impede your hi-velocity escape from danger.
14. If traveling around Boston, remember that the goal of every driver is to get ahead of the pack by whatever means necessary.
15. 'Flipping the bird' is considered a polite salute. This gesture should always be returned.

Hey Annie,

Yes, that is insane. No one can question you as to why you have a doctor's appointment and for what is it for. It's not only illegal but rude.

It is ridiculous, no question about it. No one should be asking you stuff like that.

Not that it matters but what if it was something serious? Would this person really like to know, or tell the court??

Give me a break.

On your side on this one.

Hey George,

Just venting.

Out of curiosity, is this rude or I am just loosing my marbles?

I had an ADA question why I was not going to be able to appear for her trial. Told her I was taking a pers. day for doctor's appt. She wanted to know what kind of an appt. and if I could re-schedule it. That was very weird.

I am just a little p-off that I have to explain why I am taking a day off for a district court case that will most likely get continued anyways. Ridic.

Thanks for listening. :)

Subject: FYI
Date: Monday, March 29, 2010 9:29:50 PM

Good Luck tomorrow. Go home and get some rest. No Tylenol PM. haha

Sorry: I received some disappointing news on my email while I was with u. So I was a bit bummed.

As for DEA: I kinda suspected that was the reason. You will do GREAT.

Drug Lab Process.

The sample is brought to the lab by the Quincy PD by both Det. Ward and Coen.

They will fill out the Drug Receipt:

Submitting officers, defendant/s name (if any) and description of the sample/s

Evidence office will assign the sample a lab # and obtain a gross weight of the sample.

Control card will be generated containing the pertinent information from the drug receipt.

The sample and the control card will be placed into the manila envelope with the corresponding lab #.

The sample is then placed into the safe.

The sample is assigned to a chemist randomly.

The chemist will verify that the manila envelope and control card correspond.

They will check for typographical errors, gross wt and make sure the sample is sealed and initialed by the P.O.

Once everything is OK, the chemist will log the sample out.

The chemist will open the evidence bag at the opposite end of the P.O. initials .

They will check the # of samples in the bag, description of the sample and gross wt of the sample (substance plus the pb).

In this case, representative sampling was performed. 10 pbs were analyzed. The samples were similar in size, color and texture.

The gross wt of the 10 pbs were obtained.

The samples are labeled 1 – 10 and tested one at a time to avoid contamination.

Each of the 10 pbs were weighed individually by both gross wt and net wt (substance only).

Once the samples are weighed, the prelim tests are done. Spot test and microcrystalline test are done one each of the 10 samples.

Spot test : cobalt thio will turn from a pink to a blue color(indicative of cocaine present)

AuCl: looking for X s : presents of 1of the 7 isomers of cocaine

TLTA: needles: diastereomers of cocaine: D (synthesized) vs. L (naturally occurring) cocaine

The prelim results are presumptively positive for cocaine.

10 vials are labeled with the appropriate lab# and 1 – 10. An aliquot (small amount) of sample and methanol (MeOH) is placed in each vial.

The vials are sealed and given to the MS operator to be logged in.

The MS operator will put the unknown samples onto the instrument with two known (cocaine) standards and blanks.

Blank (methanol)

Blank (MeOH)

Standard (cocaine)

Blank

Sample 1

Sample 2

Sample 3

Sample 4

Sample 5

Blank

Sample 6

Sample 7
Sample 8
Sample 9
Sample 10
Blank
Blank
Standard (cocaine)
Blank

The unknown sample will be visually compared to the standard:

By retention time (mass of the molecule)

By molecular ions (fingerprint of the molecule)

Control card is filled out with results and date and returned to the evidence office.

C of A is generated for that Lab # with its results. It is then reviewed and signed by both the custodial and confirmatory chemist.

C of A will be notarized.

C of A, sample and control card will be returned to the safe for that appropriate lab #.

Appropriate PD will pick up evidence.

Hi George,

Our relationship has been a strictly professional and will continue to be conducted in a professional manner. The integrity and prosecution of my case depends on maintaining only a working relationship with you.

Like you, I have committed and dedicated myself to my job and work incredibly hard to maintain the utmost integrity and professionalism with all of my cases. It is my responsibility to assure that the all chemists are following the policies and procedures accurately and maintain the quality control/assurance of the drug lab. It is an enormous responsibility that I take very seriously. My colleagues call me "superwoman" and say that I do too much for the lab and everyone else, in general. I am not a workaholic, but it is just in my nature to assist in anyway, possible.

My professional life and my personal life are two completely different entities. Once I am at work or dealing with work related issues, it is strictly business. As for my personal life, it will be dealt with outside of the work environment and have no bearing on my cases. I always have and always will continue to separate those two lifestyles.

As I have iterated above, our working relationship is strictly professional and has never been anything other than business.

Sincerely,

Annie

Annie,

I know he have spoken on the phone in regards to this email. Since it is in writing, and for whatever reason it was sent to me, I need to respond in order to clarify the situation.

Our contact has been, is and will be strictly professional, and it is necessary for successful prosecution of these drug cases. I have never initiated contact in a personal nature nor do I intend to.

I know you have stated in voicemail as well as cellular phone conversation on 3-25-10, that this email was sent in regards to seeing whether someone is hacking into your email system, and for whatever reason it was sent to me.

I do not know anything about your family situation nor is is something that is discussed in our conversations.

I need you to clarify this by responding to this email, because as it stands, the email that was sent to me, from whomever, leaves an impression or incinuates that I have attempted to have or had something more than a strictly professional working relationship.

I am not sure, nor do I want to know why I was sent this email, or whether I am in the middle of possible marital discourse, but I do not want to be.

I am very committed to my job and have been since day one, and I do not get involved personally with any potential or actual witnesses.

I need you to respond in writing confirming what I have stated, and what you have stated in voicemail, as well as cellular conversation, that the statements within the email are inaccurate and have no truth or bearing in my knowledge or involvement in your personal life.

I thought this important to send you this after I was able to view the email.

Hi Annie,

Thank you very much! I will tell you sometime in the future why I mentioned it.

Now, on our buddy, [REDACTED] That piece of crap just fired his 4th attorney today, and the new attorney didn't even come in on the final pre trial date which was today. He's stalling in order to get enough bail money and skip.

I'm so pissed. This guy has been a thorn in my side. I told the clerk magistrate not to move the trial and to keep it on for 3-29-10.

So pissed.

Hope you're well!

Hi George,

You are all set. I have mentioned your name with a few of the US Attorneys last week. John W., Sue S. and Glenn M. do most of the drug case with the lab. Most of my cases with them are with ATF, FBI and some DEA Agents. Most of these cases stipulate or plea. Yeah!!

Rob F., Rob R., Tim M., Peter L., and Chris B. are other US Attorneys that have had cases with me.

ADA Bucci, Suffolk Chief of Narcotics and ADA Dave Solet, Middlesex Anti-terrorism (most of the counties know my name), if your are in their presence mention my name: may get some brownie points. (or may harass u)

Hope this is helpful.

Hi George,

One of the steps of synthesizing (making) cocaine requires methanol. Some cocaine may contain ethylene glycol but it is used as a poisoning agent once it enters the body.

To make Cocaine HCL, white powdered substance, requires methanol.
To make Cocaine Base (Crack), off white chunky substance, requires methanol, baking soda and water.

Not sure if this answers your question.

Expect something in the mail.

Thank you for saying those things, I can't believe it. That was so nice of you Annie. I'm sorry I was so upset, even though I couldn't control the fact that he defaulted, I felt like I let a lot of people down. I really wanted to show everyone what I can do, and because this guy is such a scumbag, I didn't have the opportunity.

I just kept reading your email over and over again, and coming from you, that meant A LOT to me. I really needed to hear those things.

I think it's safe to say that I was venting....and I was so honored that you actually cared about me leaving.

We have a tough uphill battle everyday trying to do the right thing.

Now, with that decision, things are going to get harder.....

Glad we are on the same team...

Thanks Annie, and have a good weekend!

You're the best!

Hi,

Sorry, it's been very chaotic since the Supreme Court decision today. A lot of us have been receiving subpoenas for court. This is f***ing crazy. Anyways.

First of all, it was a great pleasure finally meeting you and an honor working with you. I would like to thank you for the tremendous work you did on this case. Although the case did not go as you had planned, I hope you realized that you did everything possible. Unlike most ADAs, you actually have strong work ethic and ambition and I commend you. Most DA I have dealt with in the past has never taken the time to understand and interpret what we do. I was quite impressed to the extent you went to. And it is very hard to impress me. In all the years I have been at the lab, I have never seen anyone put so much effort into their work. It is very nice to see that characteristic in you.

As a colleague and a friend, I would be very disappointed if you were to resign. I hope all this nonsense of resigning is all over and that you were only venting. Now if you think of the word resignation again, let me know.

I will have some words for you. Now that I have seen how dedicated you are, I am definitely spoilt.

As a colleague, I can only help you with understanding and interpreting what we do as chemist. As a friend, I can lend an ear to venting. If you need a laugh or a smart ass remark you know how to find me. Now (in your free time, hahaha) if you still want to open up a pizza shop on the side, I will be glad to be a customer.

Once again, thanks for all of your hard work and dedication. It is greatly appreciated.

-Annie

You suck. . . It is absolutely unnecessary to mail anything to Chuck. My work ethic is very different from my co-workers, I give 110% in everything I do. But if you really want to send a letter to Chuck, I insist you send a copy to Julie Nassif, Division Director. At least you will get credit for your hard work. Put your name in her presents and I will make sure she understands your dedication and commitment to your work. I am definitely not going to take the credit alone.

Every word in my email was true. There are a couple of things people who really know me understand. I work hard, I do not bullshit (ok, at least try not to), I give credit to people who deserves it and try not to take a lot of things for granted. There are few people that take their jobs seriously, it is nice to meet and work with those people.

You do not need to apologize for being upset. Venting is good . . . just do not make any rash decisions. I totally understand what it like to think that you have disappointed people, but you have to realize that they are not in your shoes and it was beyond your control. In your line of work, there will be plenty of opportunities for you to shine, it is just a matter of time. There will always be anxiety and frustration in your work, but be patient and continue to put the same hard work and dedication that I saw and you will succeed. I know this sounds like a freaking hallmark greeting card. When I was a teenager, I had someone tell me those exact words and it has made me who I am today.

I think I got 4 samples done on Friday and the rest of the day I was spent answering the phone pertaining to cases that I have done. All these cases, that we would never have being involved in we are being called into court. I know some of the DAs and Julie met with the AG on Friday, we will see what that decision will be. You're right, it is going to be tough. I use to joke with one of my coworkers, that I will need to keep a suit in my car with amount of samples I do. Now, it is not so funny . . . esp. since I do not enjoy going to court. Oh well, what can we do. I think I am going to volunteer to do all the Federal cases. We have trained to guys well. . . . Just Kidding.

Enjoy the rest of the weekend. . . Good Luck with everything.

PS: When you get upset and frustrated, there is always M&Ms, at least my cure all is chocolate. But just know you have a friend if you need to talk or anything.

Thx,

Annie

Hi,

I think I figured out def. chemist crazy math stuff. I feel like an idiot. It was staring me in the face and just did not notice. I will try to email you the calculations and how he arosed to these numbers. There are still errors as we had noticed in our meeting. Also I did some more calculations by hand regarding to Standard Deviation, SEM value, 95% CI range and a 99% CI range. I just have to re-check my calculations for any errors. I will send over his calculations with the errors and my calculations using the correct numbers.

Hopefully, I will send it today (Fri). I just have some expedited samples/Trafficing and Mass Spec stuff to do. If not, over the weekend I will email you and then on Monday I will fax over my hand written notations.

Have a good weekend.

Thanks,

Annie

Hi,

I received your fax today. Unfortunately, you would have to come to the lab to discuss the case. I am here from 6:30 am to 2:30 pm. Any day should be fine except for the following:

On June 17th, I have a defense chemist coming in for a net weight.

On June 23rd, I will be out.

Thanks,

Annie Khan

You're the best!!

Hey, stop & breathe.

Oh please, no apologies needed. You are wicked busy and I hated to bother you. This is what I get for taking work with me on my vaca.

Anyways, as for the case, with a lot of coordination, tremendous am't of work and late nights/mornings, we have success. Dave Solet charged him with trafficking Class B and armed robbery. Jeremy Bucci has him in custody for Class A narcotic and SZ violation. Steve Butts charge with Class B and possession of firearm. Chris Bator and I did a lot of work and bumped it federally b/c involved the postal service and homeland security. Bucci was more than happy to hand over the files to me.

And to top it all off, on the week of halloween, the defendant (a real winner) was charged with rape/sexual assault on a minor. Now, that hit my heart closely and for that he needs to be locked up and throw away the key. I had the pleasure of spending some time with the young lady and she is a sweetheart. So very young to have to go threw this ordeal, not just physically but mentally.

Needless to say, def. will be making a lot of friends in the federal pen, named John. haha

Thanks for getting back to me. Happy Monday!!!

Hope all is well. Would you relax,pleaseeeeeeeeeee!

Annie.....!

Sorry.....

I had 8 back to back fatals that I had to respond to over the last couple of weeks along with 2 jury trial in Superior Court, and I haven't had the chance to even breathe!!!!!!!!!!

Hmm...let me see, for that specific set of facts (stoughton robbery where D stole drugs) I would think Armed Robbery, or Unarmed Robbery depending on whether he threatened a clerk; if he broke in: It would be B & E intent to commit a felony, (either night or day); larceny from a building, and possibly malicious damage if he broke things in order to get in (that can be charged along with the B & E but cannot be a concurrent conviction with that charge).

Hmm.,...

As far as other stuff; tough to tell without more facts.

I know I am WAY TOO late in answering your email, I am very sorry!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Subject: RX Question

Georgeeeee!!

I know you are wicked busy. No rush.
I have a question about charges for pills and steroids.

The case involves Suffolk, Middlesex and Bristol counties. I am trying to bump it to Federal court b/c def. may be have robbed several pharmacies out of state. Trying to figure out the possible charges, other than SZ violation, possession and intent to distribute.

I did a case involving a Stoughton pharmacy robbery earlier this year and it was about 1000 grams of oxycodone or Class B drugs. What would be the possible charges for the def.?

Thank you SOO much!!! Greatly appreciated!!!!
